DETAILED ACTION

Claim Objections

Claims 1-8 are objected to because of the following informalities:

- a) claims 1 and 2 do not include the terms comprising or consisting of. Without either of these terms one cannot understand the meets and bounds of the claims. Appropriate correction is required. For examination purposes below the claimed medical device is considered to include a transponder emitting information by radiofrequency and a tube.
- b) Claims 1,2 and 5-8 use the pronoun “it” and one cannot ascertain precisely to what “it” refers.
- c) Claim 6 refers to “said machine” which had not been positively recited previously.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Nova et al (USPN 6,319,668). Nova discloses a device for identifying particles in a fluid using a sensor and transponder. See figure 7-8. The transponder uses radio-frequency signals for transmitting the information to a computer.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Levin (USPubN 2002/0032435). Levin discloses a device that includes a transponder emitting information by radiofrequency and a tube. See figure 6.
